In case of fire

Do not even entertain the idea of writing
a letter to inform the fire brigade.

Do not attempt to extinguish a fire however small
with body fluids—saliva, perspiration or pee.
You would only hurt yourself.

If, however, you were brought up in a home
where the expression of feelings was frowned on
you may have a backlog of tears, even tears
of laughter or joy. These can be effective
in quenching quite large conflagrations.
